#### ORIGIN OF MELS.

In early ages, corn was sounded in mortars by hand. Solotton says :— Though thou shouldst bray a fool in the mortar with a petile among wheat, yet will not his fool hiness depart from him!" The hand mills of ater times were of very a mole construction, and were operate ! principally by women. In process of time shafts were added to these machines, and they were worked by cattle. Water mills were invented about the time of Julius Casar, but they do not come into general use till A. D. 400. It is supposed that wind-mills originated inthe east and were introduced into Europe by the Crusavers. This, however, is doubted, as such calls were in use in Europe as early as the first Crusade. Feudal lo is claimed the privilege of creeting all corn unlis, and requiring their vassals to grindall their mills, called ban-mills. The building of such mills was ery expensive; hence they claimed all tools, from their dependants, by way of reaunegation. At one time the monks of Holland desired to erect a wind-mill for their own convenience; the lord of the soil opposed their purpose, saying that the wind in that district be-

longed to him-The monks appealed to their bishop, who in great indignation, claimed spiritual control of the winds, in his dinouse, and granted letters patent to the holy fathers. By improvements introduced in France in the grinding. of corn, about the year 1758, the amount of flour obtained was nearly

doubled. Saw mills are more recent in their origin, than corn mills. The earliest method known for procuring planks, was by splitting the trunks of trees with wedges, and hewing the sides

with axes.

Until the middle of the sixteeuth. century all the plank in Norway were thus manufactured. The saw is an instrument of very remote antiquity.-The inventor of it like all other benefactors ranked among the gods.— Ovid celebrated his praises in his idetamorphoses. He says the idea was suggested by the spines which project from a back-bone of a fish. By others, the discovery is attributed to the accidental use of the jaw-bone of a snake in severing a piece of wood. The saw was used in pit sawing in most of the dark ages. It was first adapted to mills in Germany, in 1772. Saws were not introduced into England till 1767. The first constructed mills were destroyed by mobs. The invention of the circular saw has added greatly to the efficiency of modern mills, and now almost every variety and form of timber used by mechanics is cut into proper shape for use, by such saws .-- [Ohio Farmer.

## BARN-YARD SCRAFINGS.

"Yankee," a Maine correspondent of the American Agriculturist, writer that two years ago, while remodeling a been yard to so arrange it in a basin form that weter would not run away from it carrying off herich manure, he had a quantity of the bed of the old yard to remove. This he carted to an old grass field and spread it on the surface, at the rate of 15 loads to the acre.— The result was that last year the good quality and the quantity of hay we increased 50 per cent, and this year the exect of the

top dressing is quite as great as last year.
This is doubtless so. Many economics farmers practice carting hundreds of loads of learth into their yards every Autumn, who re it becomes saturated with the neh marries It becomes saturated with the first marked liquids, and it is then spread out upon gross lands, and applied to other crops. This plan will pay, generally, when manure is required. The liquids from the manure yards usually contain the richest, portion of the fertilizing matters and more than one half of all this material in the country is entirely lest.

ON THE OCTSIDE OF THIS ISSUE .- First Page-Origin of Mills. Agricultural.

One of the most marked characteristies of the present day are the opportunities which are everywhere offered to the most humble citizen to provide against the lamentable effects of sickness and death upon those who are dependent upon him for daily

The numerous beneficial as-ociations of the present age enable the husband and father, with a small proportion of this world's goods to pursue their labors unembarrassed by the anxious thought which otherwise would cause many a pang of pain, and an endless number of sleepless nights.

In this country there is a greater equality of worldly possessions than in any other in the civilized world; hence the value of defences against want are very apparent.

Here, also, most men of wealth have been the makers of their own fortunes, and in many cases it will be found that the young artizan, who launches into life without any assured prospect, except the trust he reposes in his own labor, secures personal independence earlier than he who starts on his career with all the advantages of an anticipated rich inheritance.

The various beneficial societies which have been in existence for years in our larger cit. ies, formed by emigrants or the descendent of emigrants from foreign countries, or embracing laborers in particular vocations' have effected much good in a limited sphere. But within a few years a new mode has been adopted, which extends throughout the whole Union, and embraces all classes of society. This is Life Insurance, which can be employed at a reasonable cost, and by it any requisite provision can be made for a family which would be otherwise left desti-

RIVES WILMOT GRISWOLD .- The New York Evening Post furnishes the following brief biography of Mr. Griswold, who died in New York, on Thursday:---

"He was born in Rutland county, Vermont, February 15, 1815, and after travel-ling extensively through Europe and America, was married, and took orders as a minis ter of the Baptist denomination. He rurely preached, however, but from an early age has devoted himself assiduously to literary pursuits. He began by editing a small country newspaper-was afterwards associated with Horace Greeley in the publication of the New Yorker, and with Park Benjamin and Epes Sargent in that of the Brother Jonathan and the New World, and in 1842

onathan and the New World, and in 1842 took charge of Graham's Magazine, which rapidly improved under his hands.

"In the same year appeared his "Poets and Poetry of America," one of the most popular compilations of the kind ever published in this country. It was followed by the "Poets and Poetry of England in the Ninetcenth Century;" "The Prose Writers of America;" "The Female Poets of America;" "The Sacred Poets of England and ea;" "The Sacred Poets of England and America;" "Washington and the Generals of the Revolution;" "Na; olcon and the Murshals of the Empire;" "The Republican Court," &c. He was also cogaged upon an illustrated Life of Washington at the time of his death. Various meaning the court, of his death. Various miscellaneous publications, in addition to these, testify to hi industry and mental activity. Dr. Gris-wold's disease was consumption, and his just illness unusually painful and protracted.— He leaves three children, of whom the youngest is a boy, yet in his infancy."

LAW OF MARRIAGE IN RHODE ISLAND The following provisions of the law of marriage are not universally understood:

1. All marriages between a white person and a negro, ducian or mulatto, are abso-lutely null and void; and the person joining them in marriage is subject to a penalty of two hundred dollars.

2. Any ordained minister or elder who is domiciled in the State, and either of the Justices of the Supreme Court, and Wardens in the town of New Shoreham, may join persons in marriage. Clergymen from other States cannot join persons in marriage

3. No clergyman or magistrate can ioin 5. No clergy man or magnitude can join persons in marriage until he has received a certificate signed by the parties giving the information required by law, under a penalty of imprisonment not exceeding six months, or a fine not exceeding one the u sand dollars.

4. All marriages must be in the presence of at least two witnesses besides the clergyman and the parties.

€ A few days ago we received a note enclosing a communication from our friend Hon, W. H. S. Bailey, of the Bristol Phenix. We were louth to insert it, thinking that our motives for so doing might be misrepresented, and consequently it has laid on our table up to this time. Last night we received from Mr. B. a short note, as fol-

BRISTOR, Aug. 31, 1857. G. T. HAMMOND, Esq., Dear Sir:

As you did not think proper to insert the communication I forwarded to you, you will favor me by returning it by muil.

If yourself or any other gentleman had been as grossly insulted by a back driver in Bristol, us I was in your city, I would not only have published any communication you might have presented, but would also have taken up the pen in your defence.
Respectfully, your obed't servit,

W. H. S. BAYLEY. After reading the above note we were satisfied that it was our duty to have inserted the communication referred to at the time it was received. It is unnecessary to comment on its contents, for it is evidently a plain statement, and we blush for Newport manners as we read it. Had it been in our power to have spared the young man referred to from the shame of such an affair, and yet have maintained our position as an independent and truthful journalist we should have done so. As it is the lesson now administered by a RHODE ISLAND SENATOR, who is an old and esteemed member of the RHODE ISLAND PRESS, may have the influence to put those who are inclined to be discourteous to strangers on their guard, and prevent the future occurrence of so disgraceful an assault of words upon a gentleman.

To the Editor of the Newport Daily NEWS-Sir: -- Happening to be in your pleasant city yesterday morning, and wishing to take the steamer Governor for Bristol, I inquired of a smart young man named James Stuart(driver of a hack purporting to belong to the Aquidneck House,) at what time the Governor arrived. He stated that he knew nothing about the Governor, neither did he wish to. I requested him to take me tu Long Wharf, and inquired whether the Governor had an office or any place in which I could await her arrival. He very politely stated that the "the Governor carried nubody but Niggers and Irish," and he would take no passenger to the d-n boat. I requested the gentleman (?) to give me his card, but he refused. I then told him I should ascertain the hack regulations from Mayor Cranston. The worthy remarked that he didn't core a d-n neither for Bill Crauston or myself. I ascertained from the Clerk of the house at which I lodged, that this remarkably polite young gentleman was the son of Mr. Anthony Stuart, of your city.

Will you have the kindness to insert this in your interesting sheet, in order that persons visiting your city, can know what hackman to employ. Of course this nice young man will be selected. Yours, B. Bristol, Aug. 26, 1857.

GRAND EXCURSION OF THE SEASON. The Aquidneck Fire Company of this city, No. 3, Capt. B. H. Stevens, made an excursion yesterday to Rocky Point, having chartered the steamer Canonicus for that purpose. The steamer left here at halfpast 80'clock in the morning, touched at Bristol and Warren, going and returning, and got safely back at dush,

We had not the pleasure of being on board, but are informed, by an eye witness, that pleasant as was the day, it was not more so than the excursion itself and the Company which enjoyed it. We understand that about 800 tickets were disposed of and that all told, the party numbered nearly a thousand.

To say that the Fire Company acquitted themselves throughout in their usual supcrior style, is no more than might be expected, by all who know them. The Company paraded last evening after their return, escorted by Protection Company No. 5, Capt. Wm. Newton, and accompanied by an excellent Band of Music, and together made a fine appearance, and if he cannot live happily and die content, we do not believe that the State can furnish there is no hope for him." two better disciplined or more efficient Companies than those now spoken of.

The steamer Canonicus makes an excursion to Block Island from Providence to-day, stopping at Newport each way. Persons in this city wishing to enjoy a trip to the Island can embark on board this excellent and favorite steamer, at 9 1-2 o'clock, and return during the afternoon. A chowder is to be provided at the place of destination. Fare for the excursion, 75. cents from Providence, 50 cents from New-

THE EPISCOPAL CHURCH IN THE DIOcess of Montreal, -- On the 25th inst. CESS OF MONTHEAU.—On the 25th inst-his lordship the Anglican Bishop of Mon-treal, accompanied by Mrs. and Miss Ful-ford, started via the St. Lawrence and Champlain railway for New York, to sail by the next Cunard steamer for England. On the Sunday previous, he delivered a dis-course in St. John's chapel, Montreal, in which he gaze the following supergrant which he gave the following summary of the progress of the Churchin his diocese:— When I arrived in Montreal, in Septem-

her, 1850, there were 58 clergymen officiating in the diocese, serving 43 separate cores; there are now 55 clergy officiating in 51 separate cures, and there are three others vacant. Of these 55 clergy, 21 have been appointed to their cures since my arrival; the other 34 were in the diocese before; while of these 21, eleven have been licensed by me to newly formed missions or cures, the remainder to fill vacancies in old ones.

Of the 55 clergy, now officiating in the Diocese, 34 only have pursonage houses; of which 17 with more or less globe attached to them have been provided since September, 1850. Of these churches 16 have been conse-

crated by me and there are 9 in course of of crection, including the cathedral and three others, which are being rebuilt to replace the original ones, now too small or dilapidated—besides two which have been much enlarged. There are also in the diocese 33 consecrated burial-grounds, of which number 14 have been consecrated by me. I may notice the steady focrease in the funds of the Church Society, to which, however, the cathedral subscriptions this year are much in arrears—the great suc-cess which has attended the establishment of the fund for widows and orphans of the clergy; and also that very nearly £10,000 were raised last year, within the diocese, for

Loss of the Atlantic Cable.--Mr Arthur Stewart writes to the Journal of Commerce, that the application of the break by the engineer of the Niagara must have been of necessity, for the engineer knew beforehand that the engineer knew beforehand that the break would part the cable. It appears that after paying out properly 300 miles, they then lost 100 miles in going over 35 miles of ground. The cable, no doubt, encounted one of those strong under constructions. der ocean currents running across—which would have run away with rearly all they had—and which cause such difficulty in sounding with the deep-sea lead as to have got those parts of the ocean to be called infathomable. It was no doubt deemed wiser to save the balance of the cable, than, to expend the whole over two thirds on the capital of the whole over two-thirds or three quarters of the line.-Prov. Post.

New Countemeters.—A large amount of counterfeit fives on the Globe Bank of Providence, R. BE A FARMER,-To every young man who desires a long, useful, independent and happy life—one of few cares and anxietics be a farmer; or in the language of the be a farmer; or in the language of the Louisville Courier, "If a young man wants to engage in business that will insure him, in middle life, the greatest amount of leisure time, there is nothing more sure than farming. If he has an independent turn of mind, let him be a farmer. If he wants to engage in a healthy occupation, let him till the soil. In short, if he would be independent, let him get a spet of earth, keep with in his means, shun the lawyer, be temperate and avoid the dector, be honest, have a clear conscience, improve the soil, so as to leave his farm better than he found it; and then, if he cannot live happily and die content, there is no hope for him."

The defeat in England of the American horse, has taken the wind out of the suils, and money out of the purses, of quite a number of sporting geatlemen, —Memphis Louisville Courier, "If a young man wants to engage in business that will insure him,

number of sporting gentlemen .- Memphis

And if any of these sporting gentlemen have "failed" to pay their bets, the failure is intrinsically as important as the failure of the gamblers in the New York Stock Ex-change. What gives greater consideration to the latter is, that they operate upon stocks instead of horses, and have the power to implicate others in the losses which they strive to bring upon each other. The worst horse gamblers only try to lame the partieorses that they bet against; the best stock gamblers attempt to depreciate millions of property that they may profit by the fall in thousands,—Prov. Jour.

TUNNELING THE HUDSON.-The Trov Whig declares that the New York Central Railroad Company and its friends have abandoned the project of bridging the Hudson at Albany, and are now determined to construct a tunnel under the bed of the riv er at that city. The Whig says the tunnel can be constructed in three years at a cost of only \$1,000,000. It says practical englneers have made this estimate of time and cost. That a tunnel can be made and i three years, is probable enough—the old Hudson River Company demonstrated all this-it is no new thing; but that the tunnel can be built for one million dollars, is simply nonsense. Auburn American.

The reason why three New York Conn. cilmen were sent for Gen. Jackson's gold box was probably that neither of them would trust any one of the others. Considering that there is yet no authorized decisit will not be strange if ion of the award, it will not be strange if Mr. Jackson takes the save view of the suo ject and refuses to trust the whole of them. -Prov. Jour.

GREAT FORTUNES BY LOTTERIES. The world is full of histories of the good results of legalized Lotteries. They are valuable to society, because they diminish the low vice of gaming with unprincipled persons.— It is not always that those who draw prizes gain large fortunes—but when there are fifty capital prizes offered every year, there is a chance for success. The Georgia Lot-teries are admirably managed, and are drawn every Saturday. Those who wish to invest, have only to send ten, five, or two dollars and a half for a whole, half, or quarter of a ticket to Messrs, Swan & Co., Augusta, Georgia, and they will be satisfied that they are not acting unwisely. If they do not obtain an immense fortune, they may find themselves a few thousand dollars richer than they were before trying their luck. To prevent the possibility of decep-tion S. DIETETIC SALERATUS

JAMES PYLE'S

DIETETIC SALERATUS

To mong the most important improvements of the present day. Every family throughout this land should be acquainted with its intrinsic value, and thereby escape the many evils arising from the use of common Saleratus—the caustic impurities of which are acknowledged describive to health, by physicians generally. Common saleratus has the elements of caustic alkali, and readily acts on the coating of the stomach, thus derauging the digestive organs and paving the way of Dyspepsia and diseases of-every kind. Chindren are the greatest sufferers and frequently die from infantile diseases, which in formor years, were successfully treated, even without medical sid. But here is an article to be relied on.

James Pyle's Dictetic Saleratus, the result of many experiments, is entirely different from everything heretofore in use.—The perfection reached in purifying it, makes it as harmiess to the stomach as floor itself, while in point of picety it surpasses the best baking soda, and will make bread, bisenit and cake, beautifully light, nutritious, and suitable for the most dyspentic stomach. Every lady that tries it will use no other.

GEN. WALKER INVITED TO RETURN TO NICARAGUA. NEW YORK, Sept. 1 .- The Washington correspondent of the Sun says that a mes-senger has arrived in that city with a pro-posal from the heads of the church and several of the highest officers in the army of Nicaragna for General Walker to come back and place himself at the head of affairs, and has also brought with him papers of interest to the government, as well as the project of further future command of Gen. Walker.

TRIAL OF MRS. GARDNER FOR THE MURDER OF HER HUSBAND—AT-TEMPT TO QUASH THE INDICT-

MENT.
PLYMOUTH, Sept. 2—1 o'clock P. M.—
The trial of Mrs. Gardner of Hingham, for the alleged murder of her husband, commenced here this morning.

The court is erowded and much interest is manifested. A metion to quash the indictment for an alleged technical flaw was

overruled, and after the defendant had ex-housted her right of challenge, a jury has been empanneled and the trial proceeds.

Dr. Ellis of Boston, is now on the stand

and testifies pretty much as he did at the Lemor examination.

D.R. HARTLEY begs to announce to those of his patients with whom he has been in communication, that he has, in compliance with their special requests, made arrangements to establish his Ear Institution in Kow York; and he generously offers to attend all persons suffering from affections of the Ear, without charge, until cerel—thereby proving his success anequalled, and protecting the deaf from being swindled, by paying self-styled Auriszs excitaint focs in advance, and the infliction of still more serious cvils, by permiting the application of dangerous remedies by inexperienced and unskillful hands.

Dr. H. may here state that he has no connection whatever with any person advertising to cure deafness; neither has he given permission for the publication of a certificate, purporting to emanate from him; and cannot, therefore, be re-ponsible for any alarming consequences resulting from rashness and desperation. The loss of money may not be materialto some persons, but the deprivation of one of the most important of this censes, ought to be regarded and heated with more than ordinary solicitude.

Deafness, noise in the head, and all disagreeable discharges from the Ear, speedily and permanently removed, without causing the least pain or inconvenience. A cure in all cases guaranteed where malformation does not exist.

Cholera Cognae Bitters. This truly wonderful scientifie compound is recommended by the most eminent and bearned physicians of all Europe and America, and enjoys the best reputation of anything similar ever offered. It is without doubt, the best most efficient and generally acknowledged remedy against cholera, dysentery, diarrhoea, and complaints of the stomach in general. The numerous patients who have tried it according to directions have invariably found relief in a very short time, and the best proof of it is, that since this sandard remedy was introduced in the armies of the Alfies in the Crimea, the mortality of the soldiers from cholera and similar diseases was diminished by over 75 per cent; in consideration of which, the inventor was presented by the French and English governments with a gold medal, heating the inscription "Hall! M. Leroux, the great chemist and inventor, by whose knowledge our armies are preserved from cholera."

This invaluable preparation is also a remedy for bifliousness, indigestion, weakness, and general derangement of the stomach. Upon being taken, it creates appetite, and prevents the heaviness attendant upon eating by pursons who are dyspeptic.

In this city, also this remedy has been tried with the most undoubted success, and the undersigned can produce the best testimonials of our most celebrated physicians, as to its line mediate and complete success, which he will be happy at any time to show to any that may wish to see thein.

O AUTION.—In consequence of the merited popularity of the Lykins Valley Coal, and its economy for family use, some dealers in this city are buying a spurious article similar in appearance, and offering the same for the genuine coal. We take this method of cautining the public against such deception.

The genuine coal may be found at Messra, Oman & Hradford's, Messrs, Geo. Bowen & Co.'s and Mr. Chas, Williams.

REMINGTON & HENRY are the only shippers of Lykins Valley coal to New Engand.
